

DANOMIX LATEX

Latex resin additive to improve mechanical properties, bonding and reduce water absorption

DANOMIX® Latex is a latex emulsion designed to add to mortars or bonding grouts to improve mechanical properties, bonding and reduce its water absorption.

Presentation

- Weight (kg): 20
- Product code: 750012

Technical Data

Concept	Value	Standard
PH	10,0 ± 0,5	-

Additional Technical Data

Concept	Value	Standard
Solids content (%)	37,5 ± 2	-
Density to 23°C (kg/dm³)	1,01 ±0,01	-

Instruction for Use

- Shake the container before use to homogenise the product.
- Add the product to the mixing water.

Cleaning of Work Tools

- If the product is fresh, with water
- If the product is dry, scraping.
