

## GALVANISED PROFILE

Galvanised metal sheet profiles for parapet ends

These are galvanised sheet metal profiles used to finish off the waterproofing on parapets and vertical faces, thus preventing the sheet from detaching from the substrate. They are finished with JUNTODAN E or a silicone bead to prevent water from entering between the substrate and the sheet. The fixing of the metal profile to the vertical wall may vary depending on the characteristics of the substrate.

### Presentation

- Length (cm): 200
- Width (cm): 70
- Thickness (mm): 5
- Weight (kg): .7
- Product code: 710811
